

Product Information:

Disconnecting Links offer a temporary break in the connection to the earth. This allows testing of an Earth Rod whilst disconnecting it from the Lightning Protection System. Tinned Disconnecting Links are resistant to corrosion.

Available in copper or tinned.

Features:

Material: Copper or tinned copper (bar), powder-coated steel (base)

Standard: BS 7430

More Information:

Standard Earth Bars meet the requirements of most applications. However, we can design and manufacture an Earth Bar to suit special applications. Send your specification to us and we will design a bespoke Earth Bar. This design is checked and confirmed by you before work commences.

Our standard Earth Bar Bases feature pre-drilled fixing holes for ease of installation and can be supplied powder-coated to reduce the risk of corrosion.
