

Products Description

The wire clips are used as fasteners to secure flat steel wire clips to the wall in grounding systems where flat steel is used as the grounding conductor.

Made of high quality brass with brass or alloy screws for durability.

Generally applicable to the building lightning protection system, the conductor network fastening and connection, the use of matching wire clips, can make your lightning protection system installation more convenient, longer service life.

Measurement system	Metric
Place of Origin	China
Model Number	CLAMP-TAPE
Material	metal, brass
Standard or Nonstandard	Standard
Application	grounding connector, Grounding System
Certification	ISO9001
MOQ	100pcs
Shape	Tape Shape
OEM	YES
ODM	YES
Tensile Life	≥50years
