

PRODUCT DESCRIPTION

The graphite ground electrode has high strength, tensile strength, compression resistance, frost resistance, folding resistance, high and low temperature resistance, stable performance, long service life, and no maintenance during use; The Graphite Ground Rod is widely used for earthing system of power plant, transformer station, tower, communication station, airport, railway, subway station ,high building, computer room, petro plant, oil reservoir in the environmental of moist , saline and alkaline, acid and chemical corrosion medium environmental.

Material	Graphite,Steel
Size	Custom
Service life	≥30years
Diameter	according to customer's requirement
Function	used in grounding and lightning system
Available service mode	OEM,ODM
Certificate	ISO9001:2015,CE,SGS

Negotiable Price According to different material/size and and Purchase quantity
