

Product Information:

Pigtail bolts are used for concrete, wood, and other power rods to receive aerial strapping cables across suspension and terminal clamps. These bolts have one end screw thread for mounting expansion parts. The other end of the hot processing into a braid, used for hanging chain handrails, electrical, telephone cables, as well as air, refrigeration, water, ventilation column.

The pigtail bolt is a pigtail bolt used for concrete, wood and other power equipment and is a pillar for receiving overhead strapping cables across suspension clips and terminal clips. Also known as pig tail eye bolt, pig tail hook, pig tail screw, pig tail hook screw or pig tail fastener.

Dia	Length(mm)	Thread(mm)
M16	250	150
M16	300	150

Connection Plate

Yoke plate is also called clevis plate. The yoke plate is string hardware which used to couple the electrical clevis, socket tongue or insulators.

We often see the yoke plate on overhead power lines, power transmission lines. The yoke plate is installed to attach the insulators to the cross arm on one hand and to the conductor termination on the other hand. According to the shape, there are triangular yoke plates, rectangular yoke plate, and irregular yoke plate.

Type	Width(mm)	Thicknes(mm)	Length(mm)
Terminal Strap 2 Holes	75	10	173
Terminating Strap 3 Holes	50	6	370
Top conductor fitting 4 Holes	150	10	80
Steel connecting straps 5 Holes	50	10	550
