

Product Information:

Telecom Earth Bars are used in the same way as power Earth Bars in that they collect the earth points of telecoms and data connections together.

Kingsmill can manufacture Earth Bars for telecommunications bonding on request. Please contact our sales office for a quote.

Features:

Material: Copper

More Information:

Materials used in earthing systems must be able to:

withstand mechanical damage

resist corrosion

provide a low impedance path to earth

carry the maximum fault condition for the application/installation
