

## Products Description

UNI Split Bolt Clamps are fasteners used to connect in parallel two strands of wire in grounding systems that use stranded wire as the grounding conductor. Widely It is used to branch or connect aerial hard copper conductor or insulated copper conductor.

They are made of high quality brass and plated with purple copper for durability.

They are generally used for fastening and connecting conductor networks in building lightning protection systems. Using matching wire clips can make your lightning protection system easier to install and last longer.

## Product details

Material:	Brass
Weight:	0.023-0.301kg
Certificate:	CE, ISO9001,RoSH,TUV
Stock available:	Yes.Can shipping faster
Samples:	Availiable
Standard:	IEC standard
Application:	Earthing And Lightning Protection System
Available service:	OEM,ODM
Service life:	≥30years
